

1 INNOVATION FEATURES - G00472910

2

3 1. RECIPE RATING SYSTEM

4 I added in a 5 star rating system that lets you rate recipes.
5 The ratings are stored locally with Ionic Storage and persists through
6 sessions. You can rate any recipe from 1-5 stars by picking the
7 star icons on the recipe details page. The ratings also are on the
8 favourites page.

9

10 I used Ionic Storage to save ratings with recipe IDs as keys,
11 added star icon toggle functionality and added rating display
12 throughout the app.

13

14 2. SHOPPING LIST

15 I added a shopping list feature that lets you add recipe
16 ingredients to a persistent list. Users can add individual ingredients
17 from any recipe, check items off as they shop and clear completed items.
18 The list keeps on between sessions with Ionic Storage.

19

20 I made a dedicated shopping list page, added "Add to List" buttons
21 on each ingredient, implemented checkbox function for tracking purchased items
22 and added a bulk delete feature for checked items.
